

INFANT PROGRAM

Welcome to Bobbie Noonan's Infant Program. We will strive to provide your baby with an environment that will help them grow and develop through every stage by providing knowledgeable, dedicated and loving teachers. We will work as a team, with you, the parent, to achieve these goals. Bobbie Noonan's has an open door policy which allows parents to come in at any time to check on, feed, or simply play with their precious joy.

The first month and years of a child's life are the most formative in the development of mind, body and spirit. Sleep, emotional and physical nourishment, and sensory stimulation are more important in infancy than at any other time. The most vital need for the youngest children is warm, nurturing care from the adults they depend on. We must also provide them with secure surroundings and equipment and play things that meet their needs and support their individualized development.

Babies begin to develop trust at birth which helps them build a foundation to learn other important skills. Our program will offer individualized care and schedules to meet each child's needs. It is our policy that our infant care practices are responsive to the rhythm and schedules of each individualized child.

Although the infant classroom is not arranged in well-defined interest areas as are our pre-school classrooms, teachers will still provide opportunities for children to explore with their senses, imitate and pretend, share songs, read stories and play with LOTS and LOTS of love are always included. Even though each child has their own individualized schedule, we will incorporate the wonderful Bobbie Noonan's program that we are so proud of.

Be sure to check the lesson plan board in our infant room that will show you what kinds of wonderful activities that will be incorporated within your child's daily routine.

We welcome you and your infant to Bobbie Noonan's Child Care.
