

Junior Journal

Concept: As Spring comes our way, so do many little insects. We will be invaded by bugs, bugs, bugs in our shelf jobs, and outside time spent looking for bugs. As the weather gets nicer, you might consider taking a nature walk with your child. If you do so and you find interesting items to share with the class, please bring them in for our science table. I'm sure your child would love to discuss his/her discovery with their friends.

**Teacher
Appreciation Week
May 3-7**

Week 37 April 26-30

Theme: Insects

**Bits of Intelligence:
Birds**

Language Arts: Mrs. Melissa has many exciting and informative stories planned for the week. A new library favorite is Pete the Cat and The Caterpillar by Janes Dean. A picture file of insects is sure to inspire lots of conversation, wondering about various creepy, crawly bugs. Our little voices will be singing loud and clear as we continue to practice for our Spring music program.

Motor: Mrs. Hollie has a bean bag toss review that will help reinforce the alphabet. Sweeping a ball into a goal is on the agenda, as well as bouncing and catching. Lots and lots of outside play is planned with nicer weather arriving. Games we will bring outdoors include the Wonder Ball, Duck, Duck, Goose and Follow the Leader.

Craft and Writing: Mrs. Melissa sure has a busy week planned. Bugs will be everywhere this week including ladybugs, butterflies grasshoppers and ants.
