## THEME HALLOWEEN AND STRANGER SAFETY

### OCTOBER 23 - 27

### WEEK 11

#### Concept

We will dig into a pumpkin this week and discuss the smell and touch, as well as estimate how many seeds are inside. We will take out the magnifying glass and look at different patterns found on a shell and a rock. More number fun will be added to review, as we explore greater than and less than on our number line. We are accepting pumpkin donations for our science table.

#### Craft and Writing

Our readiness papers will review the letters and numbers introduced up to this point. We have some spooky crafts planned for this festive week.

Please dress your child appropriately for the crisp, fall weather, as we still go outdoors. Please label all outerwear.

#### Language Arts

Our topic of discussion this week is Halloween safety. We will also enjoy a fun Halloween themed review game, sing Halloween songs and play a Halloween game. It's tons of spooky fun this week!

#### Motor

Weather permitting we will head outdoors for motor time. "Walk and Toss" is the new activity for this week. The children will choose a ball, walk up the learning steps and then toss it into a basket. We continue to practice rolling the ball with our Wonder Ball game and practice walking up a raised balance beam.

We're gearing up for some holiday fun! Our Halloween parties are Monday, October 30th and Tuesday, October 31st from 9:00-12:00. Costumes may be worn. We have 16 kids total if you would like to bring treat bags or a special snack. Please keep in mind our nutrition policy. No candy please
