

THEME: Birds & Eggs

Did you know that there are 9,000 different types of birds? They are warm-blooded and the only animals that fly. Throughout the week, we will learn interesting facts about Birds. The children will also learn about oviparous animals that hatch from eggs.

On Thursday, April 25, we will begin our Alphabet Countdown to the End of the Year!!
Please read the calendar in your child's folder to see if they need to bring or wear something special for school that day.

Craft and Writing

Look out for many bird crafts to be flying home this week!
Robin, Peacock, Pigeon and Chick...Oh My!!!

Math & Science

In **Math** class, we will make a graph involving our favorite bird, measure their size, and sort their feathers into different categories. We will continue to review addition and subtraction skills, as well as ordinal numbers and the understanding of different coins. As a fun counting activity, we will learn how to measure using unifix cubes, counters and other objects.

In **Science** class, the children will label the parts of a bird and go on a bird watch outside.

Language

Throughout the week, we will read books about birds and chicks. We will talk about the biggest bird, the ostrich, and the smallest bird, the hummingbird. The children will learn which animals hatch from eggs and which don't.
