April 8-12 Theme: Exploring Space

Introduction: number 5

We have such an exciting week ahead of us! We will be little explorers learning about stars, the moon, the sun and the Earth. Although we'll be napping during the solar eclipse we will make a special craft to document the special occasion. Twinkle, Twinkle will be enjoyed by all this week as well as Mr. Sun and a few new space songs.

We'll practice our counting skills as we count 5 stars on our nighttime sky during circle time. Fine motor skills will also be put to the test as we try to string star shaped beads on a string. Don't worry – Mrs. Jackie will be right there to assist!! A moon "rock" toss will give our eye-hand coordination skills a workout.

The art room will be a blast as we enjoy various mediums including chalk, paint, glitter and foil. We're looking forward to a sunshine filled week of fun.
